Pallet Pooling Models

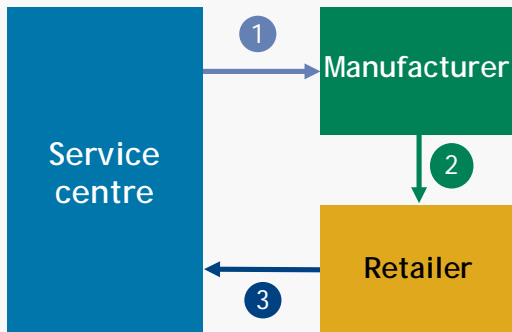

How pallet pooling works

Service Centre	Manufacturer/producer	Retailer/distributor	Service centre
1. Issue of ready-for-use equipment to manufacturer/producer.	2. Manufacturer/producer loads products on to equipment and ships through the supply chain.	3. Receiving retailer or distributor offloads goods and returns empty equipment to service centre or arranges collection.	4. Inspection/repair of equipment as necessary prior to reissue.

Examples of pallet pooling models

One-way trip

- 1 Equipment issued and delivered to manufacturer
- 2 Goods shipped on equipment
- 3 Equipment returned from retailer to service centre for inspection/repair as necessary

Main revenue stream: fee for issue of equipment from service centre

Exchange

- 1 Equipment issued to manufacturer or intermediary
- 2 Goods shipped on equipment
- 3 Equipment under load exchanged for empty equipment at point of delivery
- 4 Surplus or damaged equipment returned to service centre for inspection/repair as necessary

Main revenue stream: movement fee levied per movement under load

Transfer hire

- 1 Equipment issues to manufacturer or intermediary
- 2 Goods shipped on equipment
- 3 Equipment transferred between accounts of manufacturers, retailers and transporters as goods delivered and empty pallets transferred for re-use
- 4 Surplus or damaged equipment returned to service centre for inspection/repair as necessary

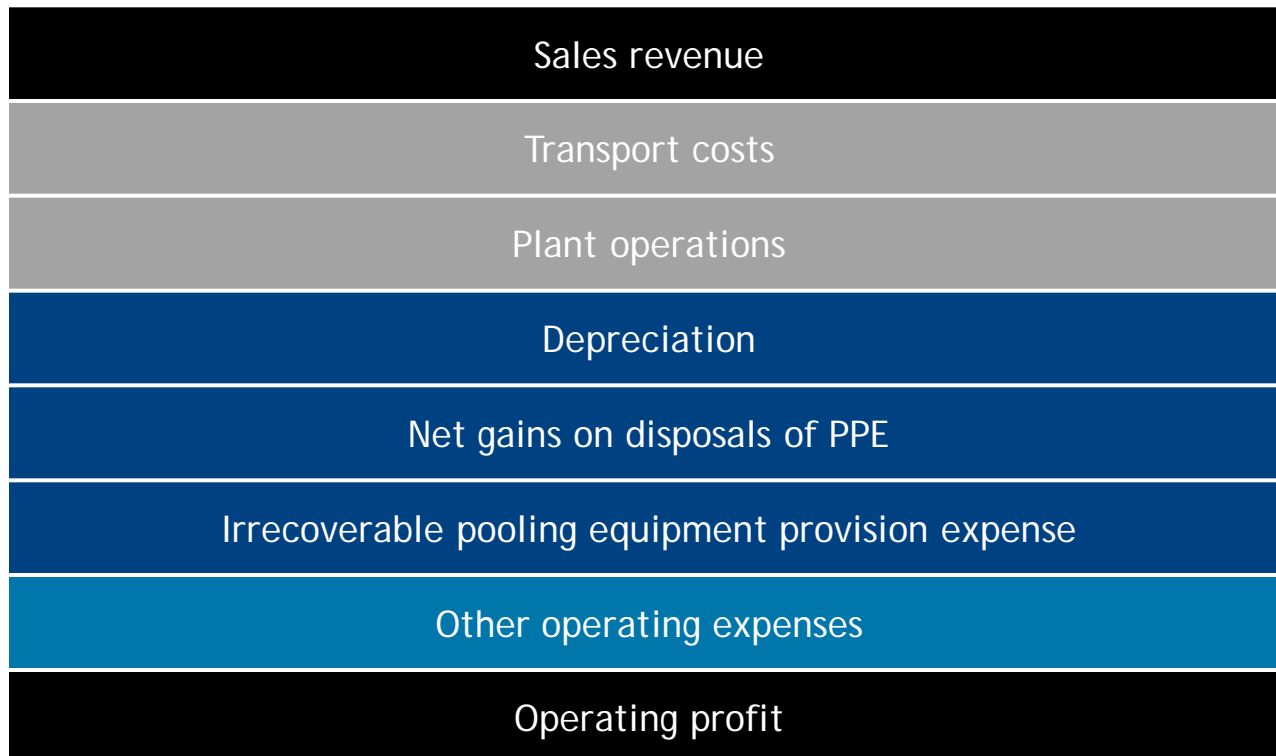

Main revenue stream: daily fee for each day equipment is in use

Pallet pooling pricing architecture

		One-way	Exchange	Transfer hire
Issue fee	Fee for issue of a quality assured pallet from a service centre	✓	✓	✓
Daily hire fee	Fee for each day that a customer uses or remains responsible for a pallet	✓	✓	✓
Transfer fee	Fee for use as equipment transfers into retail channel	✓	✓	✗
Movement fee	Fee levied per movement under load prior to return to CHEP	✗	✓	✗
Transport fee	Pallet delivery and/or collection fees	✓	✓	✓
Administrative fee	Fees for lost equipment and/or late declaration	✓	✓	✓

Note: The above illustrates the principal pricing structure across CHEP's pallets business. It does not explain fees across all Brambles' equipment pooling businesses or for any particular customer.

Appendices

Appendix 1: Glossary of terms and measures

Except where noted, common terms and measures used in this document are based upon the following definitions:

Actual rates/FX	In the statutory financial statements, Brambles translates foreign currency results into US dollars at the applicable actual monthly exchange rates ruling in each period.
Average Capital Invested (ACI)	Brambles defines Average Capital Invested as a 12-month average of capital invested, calculated as net assets before tax balances, cash and borrowings but after adjustment for accumulated pre-tax Significant Items, actuarial gains and losses and net equity adjustments for equity-settled share-based payments.
Capital expenditure (capex)	Unless otherwise stated, capital expenditure is presented on an accruals basis and excludes intangible assets, investments in associates and equity acquisitions. It is shown gross of any fixed asset disposals proceeds.
Cash Flow from Operations	Brambles defines Cash Flow from Operations as operating cash flow generated after net capital expenditure but excluding Significant Items that are outside the ordinary course of business.
Constant currency/FX	Constant currency results are presented by translating both current and comparable period foreign currency results into US dollars at the actual monthly exchange rates applicable in the comparable period, so as to show relative performance between the two periods before the translation impact of currency fluctuations.
Earnings per share (EPS)	Profit after tax, minority interests and Significant Items, divided by shares in issue.
Free cash flow	Brambles defines free cash flow as cash flow generated after net capital expenditure, finance costs and tax, but excluding the net cost of acquisitions and proceeds from business disposals.
Net new business	Brambles defines net new business wins as the change in sales revenue in the reporting period resulting from business won or lost in that period and the previous financial year. The revenue impact of net new business wins is included across reporting periods for a total of 12 months from the date of the win or loss and calculated on a constant currency basis.

Appendix 1: Glossary of terms and measures (continued)

Except where noted, common terms and measures used in this document are based upon the following definitions:

Operating profit	Operating profit is profit before finance costs and tax, as shown in the statutory financial statements.
Organic growth	The change in sales revenue in the reporting period resulting from like-for-like sales of the same products with the same customers.
PMS	Pallet Management Services, a division of Brambles operating under the IFCO brand in the USA.
Return on capital invested (ROCI)	Return on capital invested is Underlying Profit divided by Average Capital Invested (a twelve-month average of capital invested calculated as net assets before tax balances, cash and borrowings but after adjustment for accumulated pre-tax Significant Items, actuarial gains or losses and net equity adjustments for equity-settled share-based payments).
RPC	Reusable plastic crate, used to transport fresh produce.
Sales revenue	Excludes revenues of associates and non-trading revenue.
Significant Items	Brambles defines Significant Items as items of income or expense which are, either individually or in aggregate, material to Brambles or to the relevant business segment and: <ul style="list-style-type: none"> • Outside the ordinary course of business (e.g. gains or losses on the sale or termination of operations, the cost of significant reorganisations or restructuring); or • Part of the ordinary activities of the business but unusual due to their size and nature.
Underlying Profit	Brambles defines Underlying Profit as profit from Continuing Operations before finance costs, tax and Significant Items.
